

No 1013

The No 1013 faceted octagonal knob was designed for a SoHo loft in 1992. The geometry comprises rectangular, triangular, trapezoidal and square facets in what could be called a machine-age-craft aesthetic. At the same time, the design is strangely organic in the manner of a geode or crystal. Recommended finishes include, but are not limited to, polished gold, burnished brass, satin nickel and polished nickel. Full mortise entry locks, privacy locks, passage latches and tubular latches may be provided for use with this knob. It is available in 2-1/8" and 2-1/2" diameters for doors, and the [No 8013](#) cabinet knob is available in a 1-1/8" diameter. A selection of related products is also available.

Diameter: 2-3/8" 2-1/2"

Projection: 2-1/4" 2-1/2"
