

N° 1175

The No 1175 octagonal pyramid knob is both an expression of reduced geometrical form and decorative ornament. The eight shallow light-reflecting facets resemble the underside of a cut gem. The rose also has a pitched face, though shallower than that of the knob, and is conical rather than faceted. It can be substituted with a variety of alternative rose designs. Full mortise entry locks, privacy locks, passage latches, as well as tubular latches can be provided for use with this knob. Finishes available include polished nickel, polished brass, burnished brass and antique brass, as well as all other Nanz plated and patinated finishes. The knob measures 2" across with a projection of 2-5/8".

Diameter: 2"

Projection: 2-5/8"
