

No 2064

The No 2064 lever was inspired by an American Art Deco design of the 1930s. The overall outward flare softens the strict geometry of the stepped handle. The lever is adaptable to a variety of interiors, depending on the choice of finish; polished nickel, satin nickel and chrome, for example, emphasize the modernity of the design, while burnished brass and patinated finishes produce a more traditional appearance. A selection of related products is also available. All Nanz plated and patinated finishes are available. The handle can be provided with a variety of alternative rose designs. This handle can be used with traditional full-mortise locksets or manufactured for use with multi-point doors, tilt & turn windows as well as lift & slide doors.
