

Nº 3230

The finely engineered No 3230 lightweight concealed hinge consists of precision milled scissor-like arms which extend when pivoted, allowing a door or panel to swing open as much as 180 degrees. The hinge is completely invisible when the door is closed. This hinge is ideal for millwork doors, or lightweight interior doors. The No 3230 can be finished in a wide variety of Nanz plated and patinated finishes.

Height: 7-1/2"

Width: 3"
