

NANZ

N° 5533 KT

The N° 5533KT multipoint escutcheon plate is shown here paired with the N° 2921 lever, based on a design by Gio Ponti from the 1950s. The modern racetrack design provides balance of form when paired with the slender handle. The escutcheon is designed to be used with multipoint locking systems and can be provided with a cut-out for profile cylinder or thumbturn. As multipoint systems vary greatly in configuration, the escutcheon plate will be customized to operate the specified system. The same design can be used simply as a push plate. All Nanz plated and patinated finishes are available.103474
