

N° 6025DR

The N° 6025DR recessed pull is robustly functional yet handsomely proportioned and detailed. The gently swelling penannular handle is attached to a straight horizontal bar. Gaining popularity throughout the 20th century, the pull's pragmatic design is reminiscent of nautical hardware. The N° 6025 is shown with a drop ring but is also available with a keyhole cutout or with a thumbturn. It is frequently specified for use with Harmon hinge doors. The face has four exposed screws. All plated and patinated finishes are available.
