

N° 8699

Based on a design by Isabel Sorenson, the No 8699 is a knob inspired by the capital letter I. Concave at the face with an integral base of matching diameter, the cabinet knob most resembles an I in the Goudy font designed By Frederic William Goudy (1865-1947). Available in five sizes, the modern pull is at its best in both brass and nickel variations and can be used in back-to-back configurations for shower door pulls. All Nanz plated and patinated [finishes](#) are available.
