

N° 6089

The No 6089 round, recessed finger-pull reflects the modern, functional form that became popular at the turn of the 20th century. The clean lines and even proportions, however, make this simple pull appropriate for a variety of styles and interiors. The dimensions make it suitable for either pocket doors, where the visible hardware is to be kept to a minimum, or for window or cabinetry hardware. The pull is also available as a thumbturn and a keyhole escutcheon. Finished to order in a wide range of finishes.
