

N° 8209B

The N° 8209B cabinet knob, designed in the late 19th century, exhibits a cool, restrained elegance, anticipating the Style Moderne in France by perhaps two decades. A large beaded knurl rings the domed face of the knob. Optional rosettes are available at an additional cost. Recommended finishes include burnished nickel, polished brass, burnished brass, polished chrome, and antique silver. It is often specified with the companion [N° 1209](#) knob, which is manufactured in a variety of sizes for full-size doors. All Nanz plated and patinated [finishes](#) are available.
